Projects

Daycare Manager | Node.js, MySQL | **Github**   **Full Stack Developer**
Single-page web app for managing my church daycare.
- Incorporates Express.Js to host a local server to render the code on the laptop..
- Dynamically renders features and components using Handlebar.js with Sequelize .
- Utilizes Bootstrap, CSS, and SQL queries to retrieve the children and their timesheets.

Heroes Vs Heroes | API's | JSON Proxy | **Github** | **Live**   **Back-End Developer**
Single-page web app for estimating who would win in a fight between heroes.
- Uses the Superhero API to get stats for each superhero.
- Compares the stats and decides the winner based on a point system.
- Returns gifs from the Giphy API showing the winner.

Bamazon | Inquirer, MySQL | **Github**   **Back-End Developer**
Single-page web app for estimating who would win in a fight between heroes.
- Utilizes the CLI table module to show a table of products.
- Uses inquirer to get the customer order.
- Returns the table after the order is made.
